CONTENTS OF VOLUME 30

ARNASON, T. J., PERSON, C. O., AND NAYLOR, J. M.—Radiation-induced mutations in wheat and barley, 743.

ASSELBERGS, E. A. M. and FRANCIS, F. J.—Studies on the formation of vitamin C in slices of potato tissue, 665.

BANNAN, M. W.—The microscopic wood structure of North American species of *Chamaecyparis*, 170.

BENNETT, W. C. G.—See Krotkov, G.

BIDWELL, R. G. S., KROTKOV, G., and REED, G. B.—Paper chromatography of sugars in plants, 291.

BISHOP, C. J.—The influence of polyploidy on the X-ray sensitivity of cells, 139. See MacDonald, R. E.

BURTON, M. O. and LOCHHEAD, A. G.—Production of vitamin B_{12} by *Rhizobium* species, 521.

CAIN, R. F.—Studies of Fungi Imperfecti. I. *Phialophora*, 338.

CLENDENNING, K. A.—See Weinberger, P.

CLENDENNING, K. A., WAYGOOD, E. R., and WEINBERGER, P.—The carboxylases of leaves and their role in photosynthesis, 395.

CORMACK, M. W.—Winter crown rot or snow mold of alfalfa, clovers, and grasses in Alberta. II. Field studies on host and varietal resistance and other factors related to control, 537.

DANSEREAU, P. and SEGADAS-VIANNA, F.—Ecological study of the peat bogs of Eastern North America. I. Structure and evolution of vegetation, 490.

DION, W. M.—Production and properties of a polyphenol oxidase from the fungus *Polyporus versicolor*, 9.

FRANCIS, F. J.—See Asselbergs, E. A. M.

FRITZ, C. W.—Brown stain in pine sapwood caused by *Cytospora* sp., 349.

GAERTNER, E. E.—Observations on the host range of *Cuscuta europa* among the Compositae, 682.

GIBBONS, N. E.—See Robinson, J.

GILPATRICK, J. D.—See Weintraub, M.

GOOD, H. M.—See Thacker, D. G.

GORDON, W. L.—The occurrence of *Fusarium* species in Canada. II. Prevalence and taxonomy of *Fusarium* species in cereal seed, 209.

GRAY, P. H. H. and TAYLOR, L. J.—Inhibition of the bacteriostatic action of laurylamine saccharinate by organic matter, 674.

GROVES, J. W.—The genus *Tympanis*, 571.

HANSL, N. and WAYGOOD, E. R.—Kinetic studies of plant decarboxylases and carbonic anhydrase, 306.

HUGHES, E. O.—*Closterium* in central Canada, 266.

JAMES, N. and LEJEUNE, A. R.—Microflora and the heating of damp stored wheat, 1.

JOHNSON, L. P. V.—See Skoropad, W. P.

JOHNSON, T.—Cultural variability in *Septoria avenae* Frank, 318.

JORDAN, D. C.—Studies on the legume root nodule bacteria. II. The production and behavior of colonial mutants produced by X-ray irradiation, 125. III. Growth factor requirements for effective, ineffective, and parasitic strains, 693.

KROTKOV, G.—See Bidwell, R. G. S.

KROTKOV, G. and BENNETT, W. C. G.—Synthesis and hydrolysis of sucrose by wheat leaves, as determined by the vacuum infiltration method, 28.

LARTER, E. N.—See Unrau, J.

LEJEUNE, A. R.—See James, N.

LOCHHEAD, A. G.—See Burton, M. O.

LOPATECKI, L. E. and NEWTON, W.—The decomposition of dithiocarbamate fungicides, with special reference to the volatile products, 131.

MACDONALD, R. E. and BISHOP, C. J.—Phloretin: an antibacterial substance obtained from apple leaves, 486.

MACFARLANE, C.—A survey of certain seaweeds of commercial importance in southwest Nova Scotia, 78.

MCGINNIS, R. C. and UNRAU, J.—A study of meiosis in a haploid of *Triticum vulgare* Vill. and its progenies, 40.

MACHACEK, J. E. and WALLACE, H. A. H.—Longevity of some common fungi in cereal seed, 164.

CONTENTS OF VOLUME 30

ARNASON, T. J., PERSON, C. O., AND NAYLOR, J. M.—Radiation-induced mutations in wheat and barley, 743.

ASSELBERGS, E. A. M. and FRANCIS, F. J.—Studies on the formation of vitamin C in slices of potato tissue, 665.

BANNAN, M. W.—The microscopic wood structure of North American species of *Chamaecyparis*, 170.

BENNETT, W. C. G.—See Krotkov, G.

BIDWELL, R. G. S., KROTKOV, G., and REED, G. B.—Paper chromatography of sugars in plants, 291.

BISHOP, C. J.—The influence of polyploidy on the X-ray sensitivity of cells, 139. See MacDonald, R. E.

BURTON, M. O. and LOCHHEAD, A. G.—Production of vitamin B_{12} by *Rhizobium* species, 521.

CAIN, R. F.—Studies of Fungi Imperfecti. I. *Phialophora*, 338.

CLENDENNING, K. A.—See Weinberger, P.

CLENDENNING, K. A., WAYGOOD, E. R., and WEINBERGER, P.—The carboxylases of leaves and their role in photosynthesis, 395.

CORMACK, M. W.—Winter crown rot or snow mold of alfalfa, clovers, and grasses in Alberta. II. Field studies on host and varietal resistance and other factors related to control, 537.

DION, W. M.—Production and properties of a polyphenol oxidase from the fungus *Polyporus versicolor*, 9.

FRANCIS, F. J.—See Asselbergs, E. A. M.

FRITZ, C. W.—Brown stain in pine sapwood caused by *Cytospora* sp., 349.

GAERTNER, E. E.—Observations on the host range of *Cuscuta europa* among the Compositae, 682.

GIBBONS, N. E.—See Robinson, J.

GILPATRICK, J. D.—See Weintraub, M.

GOOD, H. M.—See Thacker, D. G.

GORDON, W. L.—The occurrence of *Fusarium* species in Canada. II. Prevalence and taxonomy of *Fusarium* species in cereal seed, 209.

GRAY, P. H. H. and TAYLOR, L. J.—Inhibition of the bacteriostatic action of laurylamine saccharinate by organic matter, 674.

GROVES, J. W.—The genus *Tympanis*, 571.

HANSL, N. and WAYGOOD, E. R.—Kinetic studies of plant decarboxylases and carbonic anhydrase, 306.

HUGHES, E. O.—*Closterium* in central Canada, 266.

JAMES, N. and LEJEUNE, A. R.—Microflora and the heating of damp stored wheat, 1.

JOHNSON, L. P. V.—See Skoropad, W. P.

JOHNSON, T.—Cultural variability in *Septoria avenae* Frank, 318.

JORDAN, D. C.—Studies on the legume root nodule bacteria. II. The production and behavior of colonial mutants produced by X-ray irradiation, 125. III. Growth factor requirements for effective, ineffective, and parasitic strains, 693.

KROTKOV, G.—See Bidwell, R. G. S.

KROTKOV, G. and BENNETT, W. C. G.—Synthesis and hydrolysis of sucrose by wheat leaves, as determined by the vacuum infiltration method, 28.

LARTER, E. N.—See Unrau, J.

LEJEUNE, A. R.—See James, N.

LOCHHEAD, A. G.—See Burton, M. O.

LOPATECKI, L. E. and NEWTON, W.—The decomposition of dithiocarbamate fungicides, with special reference to the volatile products, 131.

MACDONALD, R. E. and BISHOP, C. J.—Phloretin: an antibacterial substance obtained from apple leaves, 486.

MACFARLANE, C.—A survey of certain seaweeds of commercial importance in southwest Nova Scotia, 78.

MCGINNIS, R. C. and UNRAU, J.—A study of meiosis in a haploid of *Triticum vulgare* Vill. and its progenies, 40.

MACHACEK, J. E. and WALLACE, H. A. H.—Longevity of some common fungi in cereal seed, 164.

McKEEN, C. D.—*Aphanomyces cladogamus* Drech., a cause of damping-off in peppers and certain other vegetables, 701.

McKEEN, C. G.—Studies of Canadian Thelephoraceae. IX. A cultural and taxonomic study of three species of *Peniophora*, 764.

McKEEN, W. E.—*Phialophora radicicola* Cain, a corn rootrot pathogen, 344.

MACPHERSON, M. G. and YOUNG, E. G.—Seasonal variation in the chemical composition of the *Fucaceae* in the Maritime Provinces, 67.

MINSHALL, W. H. and SCARTH, G. W.—Effect of growth in acid media on the morphology, hydrogen-ion concentration, viscosity, and permeability of water hyacinth and frogbit root cells, 188.

MORRISON, J. W. and UNRAU, J.—Frequency of micronuclei in pollen quartets of common wheat monosomics, 371.

MOSS, E. H.—Grassland of the Peace River region, Western Canada, 98.

NAYLOR, J. M.—See Arnason, T. J.

NEWTON, W.—See Lopatecki, L. E.

PERSON, C. O.—See Arnason, T. J.

PRAT, H.—Microcalorimetric studies on germinations of cereals, 379.

REED, G. B.—See Bidwell, R. G. S.

RILEY, C. G.—Studies in forest pathology. IX. *Fomes igniarius* decay of poplar, 710.

ROBERTS, D. W. A.—Physiological and biochemical studies in plant metabolism. V. The effect of changes in soil water content on the physiological heterogeneity in the first leaf of wheat, 50. VI. The effect of ontogeny on the physiological heterogeneity in the first leaf of wheat, 558.

ROBINSON, J.—The effects of salts on the nitritase and lactic acid dehydrogenase activity of *Micrococcus halodenitrificans*, 155.

ROBINSON, J. and GIBBONS, N. E.—The effect of salts on the growth of *Micrococcus halodenitrificans* n. sp., 147.

ROUSSEAU, J.—Les zones biologiques de la Péninsule Québec–Labrador et l'Hémiarctique, 436.

SANFORD, G. B.—Persistence of *Rhizoctonia solani* Kühn in soil, 652.

SAVILE, D. B. O.—A study of the species of *Cintractia* on *Carex*, *Kobresia*, and *Scirpus* in North America, 410.

SCARTH, G. W.—See Minshall, W. H.

SEGADAS-VIANNA, F.—See Dansereau, P.

SHU, P.—Further studies on the nitrogen source for the production of amylolytic enzymes by submerged culture of *Aspergillus niger*, 331.

SHU, P. and THORN, J. A.—Carbon and oxidation–reduction balances and the estimation of fermentation efficiencies of aerobic fermentations, 252.

SKOROPAD, W. P. and JOHNSON, L. P. V.—Inheritance of resistance to *Ustilago nuda* in barley, 525.

STARK, E. and TETRAULT, P. A.—Observations on amylolytic bacteria. III. Cultural conditions influencing the breakdown of starch by stenothermophilic bacteria belonging to *Bacillus stearothermophilus*, 360.

TAYLOR, L. J.—See Gray, P. H. H.

TETRAULT, P. A.—See Stark, E.

THACKER, D. G. and GOOD, H. M.—The composition of air in trunks of sugar maple in relation to decay, 475.

THORN, J. A.—See Shu, P.

UNRAU, J.—See McGinnis, R. C.; Morrison, J. W.

UNRAU, J. and LARTER, E. N.—Cytogenetical responses of cereals to 2,4-D. I. A study of meiosis of plants treated at various stages of growth, 22.

WALLACE, H. A. H.—See Machacek, J. E.

WAYGOOD, E. R.—See Clendenning, K. A.; Hansl, N.

WEINBERGER, P.—See Clendenning, K. A.

WEINBERGER, P. and Clendenning, K. A.—Glutamic carboxylase of the mature wheat leaf, 755.

WEINTRAUB, M. and GILPATRICK, J. D.—An inhibitor in a new host of tobacco ring spot virus, 549.

WETTER, L. R.—The proteolytic enzymes of microorganisms. IV. Partial purification and some properties of extracellular protease from *Mortierella renispora* Dixon-Stewart, 685.

WRIGHT, N. S.—Studies on the witches' broom virus disease of potatoes in British Columbia, 735.

YOUNG, E. G.—See Macpherson, M. G.
